

LINGENFELTER

C8

Spanner Wrench Set

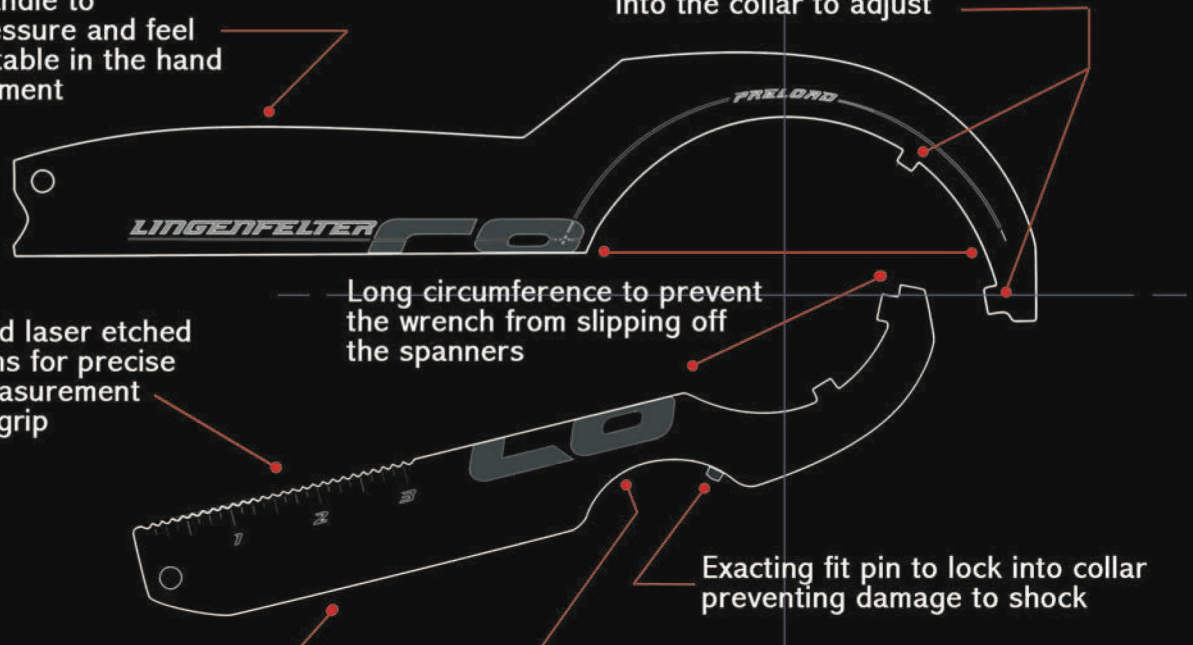

The only specifically designed precision C8 suspension tools for proper height adjustment and performance tuning.

PART# L950117420

Contoured handle to distribute pressure and feel more comfortable in the hand during adjustment

Asymmetrical teeth allow the wrench to naturally rotate into the collar to adjust

Flat bottom and laser etched ruled serrations for precise ride height measurement and improved grip

Long circumference to prevent the wrench from slipping off the spanners

Exact fit pin to lock into collar preventing damage to shock

Ergonomic handle to fit comfortably into hands for better leverage

Precise radius to securely wrap around threaded shock collar and prevent wrench from slipping during adjustments.

Made in USA

The Lingenfelter Spanner Wrench is precisely designed for use on C8 Corvettes and is a must for performance enthusiasts to optimize handling for track days. With its precisely engineered size and ergonomic shape, the C8 Spanner Wrench offers a comfortable grip, maximum leverage and clearance for adjusting the shock spanners to desired rideheight. The tool has also been designed to store neatly in the recess located in the glovebox under the owners manual.
