FRONT LOWERING KIT

Replacement for stock front lift actuator seat to allow front ride height tuning of 0.50"- 0.75" drop, the maximum you can lower the car to retain the OEM's design and load tolerances of the front lift system. Kit provides an aggressive performance stance without hindering stock shock or factory spring performance.

LINGENFELTER

PERFORMANCE ENGINEERING

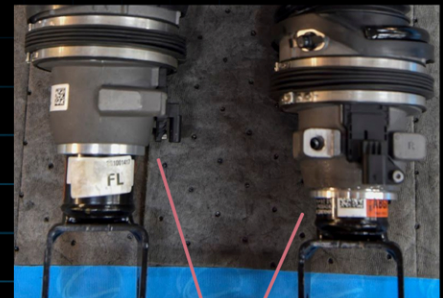

- Precision Machined out of 6061 Aluminum in the USA
- Critical Tolerances are Turned to ± 0.0005 inches
- Provides the Maximum Amount of Drop at 0.75 inches
- Tune with a 0.25 inch Spacer to Allow for a 0.50 inch Drop
- Designed and Engineered in House

Any more than a 0.75 inch drop will have the front shock lift housing rest on the NON design intent mating surface

Competitors 1inch lowering spacers

Competitions 1 inch drop spacer, there is a gap between the bottom of the front lift housing and the surface of the spacer where the housing should be resting on.
