Parts List

LPE C5/C6 Corvette Pedal Cover Kit Installation Instructions (MT/AT Applications)

C5 & C6 Corvette Pedal cover kit MT Wide Gas Pedal L820040197

#	Description
1	Wide gas pedal cover
1	Brake pedal cover
1	Clutch pedal cover
1	Foot rest cover
8	8 x 1/2" self tapping countersink screws
8	8-32 lock nuts
8	8-32 x 1" bolts
4	Clam shells brackets

C5 & C6 Corvette Pedal cover kit MT Standard Gas Pedal L820140197

#	Description
1	Standard gas pedal cover
1	Brake pedal cover
1	Clutch pedal cover
1	Foot rest cover
8	8 x 1/2" self tapping countersink screws
8	8-32 lock nuts
8	8-32 x 1" bolts
4	Clam shell brackets

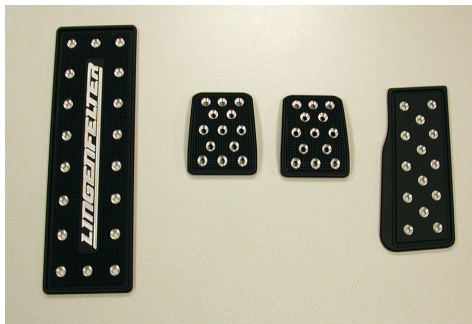

C5 & C6 Corvette Pedal cover kit AT Standard Gas Pedal L820050197

#	Description
1	Standard gas pedal cover
1	Brake pedal cover
1	Foot rest cover
8	8 x 1/2" self tapping countersink screws
4	8-32 lock nuts
4	8-32 x 1" bolts
2	Clam shell bracket

added.

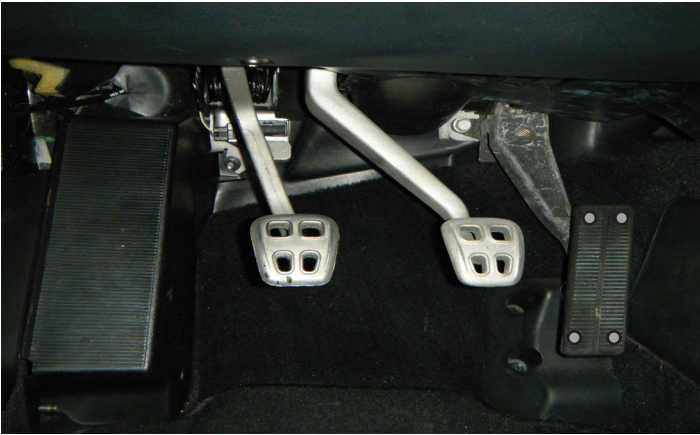

Tools & Materials Required

- Phillips screwdriver or drill bit
- 9mm wrench
- 3/32" Allen key (included in kit)
- Safety glasses
- Flashlight
- 1/8" drill bit
- Silver marker

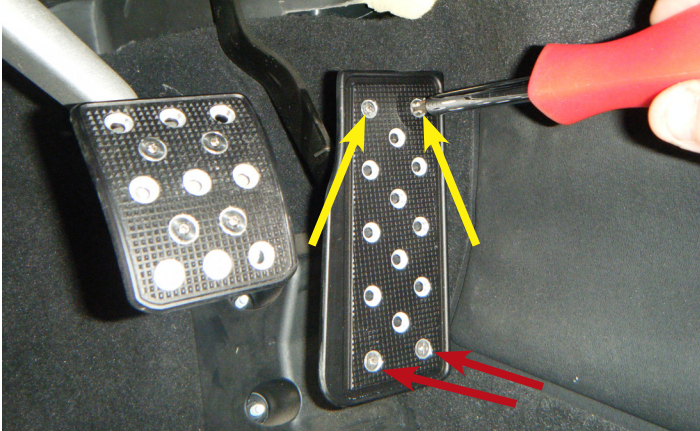

Read the entire instruction manual before beginning installation. Some stock parts will be used in reassembly.

When referencing the side of the vehicle, the driver side of the vehicle is considered the left side and the passenger side of the vehicle is considered the right side of the vehicle.

WARNING: The C5/C6 Corvette MT wide pedal kit (PN: L820040197) is intended for installation in race vehicles ONLY. The width of the gas pedal is intended to better facilitate the Heel and Toe driving technique. The close proximity of the gas and brake pedal covers included in this kit can potentially lead to the gas pedal being inadvertently pressed while attempting to brake.

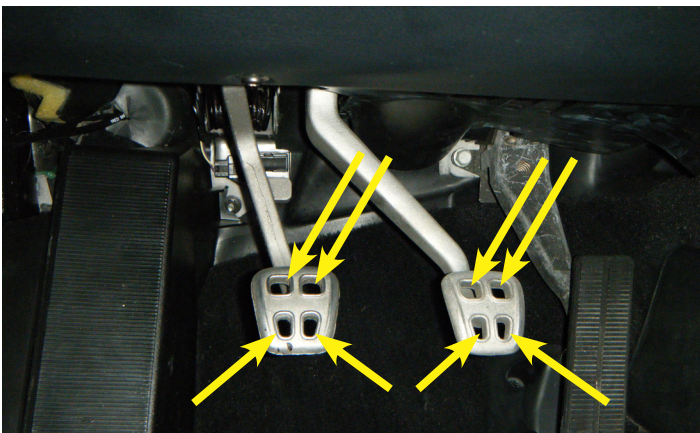

1. Line up the supplied gas pedal cover on the gas pedal and mark the location of the four screw holes using a silver marker, as shown in the illustration by the silver dots. Remove the gas pedal cover and drill a pilot hole at each marked location using a 1/8" drill bit.

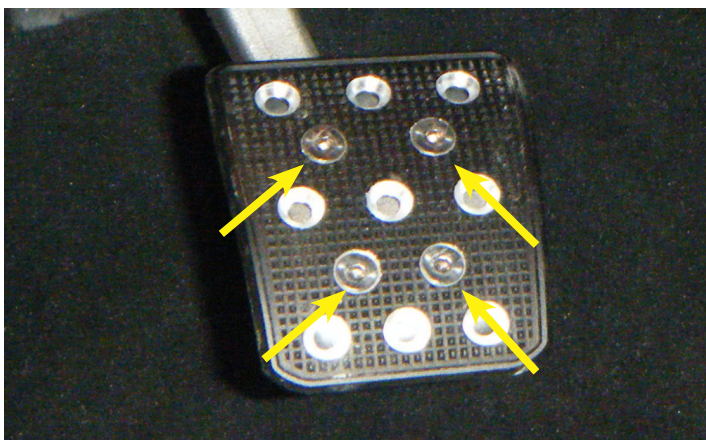

2. Using a Phillips head screwdriver, install the four (4) self tapping screws into the pedal cover holes as shown.

NOTE: The accelerator pedal is made of a hard plastic. Take care not to overtighten the self tapping screws.

3. The mounting bolts will run through the holes, as illustrated by the arrows, in the stock pedals.

4. The pedal cover will be installed in the following step. The location of the supplied mounting bolts are shown in the illustration.

5. Mount the pedal cover with the supplied clam shell brackets, bolts, and lock nuts as shown. The arrows in step 4 show the placement of the bolts on the front of the cover.

NOTE: To ensure that the pedal cover is sufficiently fastened to the pedal, make sure that the end of the bolt extends through the lock nut.

6. For MT applications, repeat step 5 for the clutch pedal.

7. Mark the screw locations on the foot rest and drill the pilot holes using the 1/8" drill bit. Using a Phillips head screwdriver and four (4) of the self tapping screws included, screw on the foot rest cover. Take care to ensure that the foot rest cover is straight and covers all of the OEM foot rest.

8. Vacuum out the metal shards and clear away any other debris.

9. The installation of the LPE Pedal Cover Kit is now complete.

NOTE: Make sure to check the pedals periodically to ensure that the fasteners have not loosened over time.
